**Scope of Project:**

Using existing website, re-design using new, more stable software. We will conduct a complete re-design using professional software over the next 2-months in the hopes of launching an (almost) exact copy that uses newer, faster, and more professional software that will take us past the next 5-years. I used the term 'almost' because we can make it look almost identical, but there are some limitations when you use code rather than simply clicking, dragging and pointing something into your overall design.

We have taken GT Metrix and Google PageSpeed Insights as a 'baseline' of the current website's performance and Emailed them to you; we will repeat this process once the new website is complete with the expectation to significantly beat the current page load times; improve upon Google's Cell phone measurement with the goal of hopefully securing a better SEO score.

**Delivery Target: End of February 2023**

**Notes: The new website will be built on a Development server in the UK, we will Email you a URL so you can review as we progress.**
